

THE WAY OF THE CREED

GAME INSTRUCTIONS

Your Team #: _____

Object

Your goal is to answer correctly the questions on the Apostles' Creed and then be the first to place 12 strips with the articles of the Creed in the correct order.

Play

We will divide into teams. Your team will move through four stations. At each station, you will have to answer questions correctly in order to earn three Creed Strips. Once all the teams have finished all four stations and collected all 12 Creed Strips, we will all play the Final Challenge, during which you will race to arrange your 12 strips in the correct order.

Round I

- ▶ Your group will be assigned a station to do first. From there, you will rotate clockwise through the stations.
- ▶ When your group arrives at the first station, the facilitator will begin asking questions. You may discuss your thoughts before giving a final answer.
- ▶ Once you've answered all the questions correctly, your group will receive three Creed Strips. Hang on to these: you'll need them for the final round.
- ▶ Listen for the signal that it's time to rotate to the next station. All groups will complete all four stations.
- ▶ When all groups have been to each station and collected all 12 Creed Strips, we will begin the final challenge!

Final Challenge

- ▶ Form a single-file line in front of your section of wall with 12 strips of tape.
- ▶ Choose one adult to stand near the front of the line, holding the set of strips face down. Make sure to shuffle them!

- ▶ On “Ready, set, go,” the first person in line will take one random Creed Strip, walk to the wall, and stick the Strip on what he or she thinks is the right piece of tape. The player then moves to the back of the line.
- ▶ Play proceeds as each group member in turn takes a strip and attempts to place it in the correct order.
- ▶ If a player believes a strip is out of place, that player may use his or her turn to reposition one or more strips rather than placing a new one.
- ▶ Adults may assist small children, but older children should play independently.
- ▶ When your group believes you have the correct order, signal by saying, “Done!” and doing 10 jumping jacks.
- ▶ The group that gets all of the articles correctly in order first wins!
